

INFORMATION SHEET

Focusing on emergency-related applications, the EU-funded [AURORA project](#) (Safe Urban Air Mobility For European Citizens) will develop artificially intelligent, urban autonomous flight solutions for Unmanned Aerial Vehicles (UAVs) and self-piloting passenger-carrying VTOL (Vertical Take-Off and Landing) aircraft. AURORA also aims to have a direct impact on building knowledge and public acceptance within society for introducing UAM at urban, suburban and peri-urban level, aligned with evolutionary development of smart city multimodal mobility.

To achieve this, we will bring together different UAM stakeholders in workshops that will promote debate and foster co-creation of meaningful services that answer to real needs.

More about AURORA

AURORA (sAfe Urban aiR mObility for euRopeAn citizens) is an EU-funded project (H2020-MG-3-6-2020 Research and Innovation Action "Towards sustainable urban air mobility") that will develop and integrate safety-critical technologies to support autonomous flight UAM in urban environments, focusing its demonstrations primarily on emergency-related applications.

By facilitating the integration of UAM in a safe, secure, quiet and green manner, AURORA proposes to pave the way towards smarter cities and pioneering services. AURORA's unique multidisciplinary consortium will not only bring exciting new technological developments, but also ensure that innovation in UAM meets the needs of citizens and stakeholders, resulting in services that create added value for them.

Project Consortium

Why am I being invited?

To foster adoption of UAM, AURORA will involve end-users and relevant stakeholders in all phases of its journey. AURORA believes in creating solutions that do not only extend and complement current mobility systems, but more importantly have a beneficial impact on people and society.

Therefore, we made a selection of stakeholders that we believe will be able to add value to the discussions and we invite you to join us and provide us with your valuable input.

Your experience is crucial for the AURORA project. As a stakeholder you either represent a group that has interest in the project outcomes or that will be impacted by our outcomes. This is why your input is so important for us and the reason why we chose to invite you to be part of our community of stakeholders.

This project has received funding from the European Union's Horizon 2020 research and innovation programme (H2020-MG-3-6-2020 Research and Innovation Action "Towards sustainable urban air mobility") under Grant Agreement No. 101007134.

What does it entail to participate?

You will be asked to participate in different activities (mainly **stakeholder workshops and interviews**) throughout the project (2020-2023). These will be conducted by the European Passengers' Federation (EPF) and their timing and details will be communicated promptly before the events.

This is a **voluntary** experience and you can withdraw your participation at any time. You can also choose to participate only in certain activities. You are free to refuse to answer any questions or provide any information.

What happens with your input?

Your input will be used for the **project's research activities** and **contribute to key technological developments** on UAM in Europe. It may be used to write articles for peer-reviewed journals and relevant industry magazines, for presentations at conferences and workshops, and in the promotion of the project in general.

The notes, videos or audio recordings of the sessions **will only be used for the research purposes**.

We will not link your statements to you or your organisation without your permission. The answers you provide during our activities will be referred to the general group of stakeholders and not single out every person. If we would like to quote you we will ask your permission first.

The information you provide and recordings will be processed and retained internally for the lifetime of the project. After the research ends, it will be either permanently and irrevocably deleted after a maximum of 5 years after the project closure.

What's in it for you?

Besides being able to join a network of peers in UAM and learn from each other's experience, by becoming an AURORA stakeholder you will also get to influence important advances in safety operations in UAM and smart city solutions, contribute to the development of regulatory standards on urban air mobility and be the first one to know about our exciting technological developments.
